## **Special Agromet Advisories for CORONA virus (COVID-19) transmission in Bangladesh**

### **Agromet Advisories**

Farmers and all other farm managements are advised to follow the guidelines of Government of Bangladesh to avoid infection and social transmission of CORONA virus (COVID-19). Precautions and safety measures should be taken up to prevent the Carona virus spread. Simple measures include social distancing, maintaining personal hygiene by washing hands with soap, wearing of face mask, drink hot water, stay at home and cleaning of implements and machinery. Farmers should not work in a group; consult with a doctor in case of any symptom. Please stay at home does not visit the field until it is very necessary.

### **Salient Weather Conditions & Forecast**

As per the weather forecast of Bangladesh Meteorological Department (BMD) during next 24 hours' light to moderate rain/thunder showers accompanied by temporary gusty/squally wind is likely to occur at most places over Khulna, Barishal, Dhaka, Rajshahi & Rangpur divisions and at many places over Mymensingh, Chattogram & Sylhet divisions with moderately heavy to very heavy falls at places over the country. Mild heat wave is sweeping over Sylhet division and the regions of Pabna, Kurigram, Kishoregonj & Feni and it may abate. Day temperature may fall by (1-2)°C and night temperature may fall slightly over the country. As per the outlook issued by BMD for next 72 hours' rain/thunder showers activity may decrease. During last four days, light to very heavy rainfall occurred most of the district of the country and as per the quantitative medium range weather forecast; most of the districts of the country are likely to receive light to heavy rainfall in the next five days. Detail Agromet advisory are given below:

### **Boro paddy**

#### **Ripening to Harvesting stages**

- Drain out water from crop field 15 days before harvesting.
- Continue harvesting the crops on non-rainy days. After the harvest, immediately keep it in safe and dry place for drying of grains.

#### **Jute:**

- Drain out water, if any, immediately from jute field
- At this time scorpion insect attack can be seen. In the first stage of attack, when the insects are grouped on the leaf, the leaf including the insect should be lifted and trampled, pressed in the hole or dipped in water mixed with kerosene.

### **Vegetables**

- In case of infestation of *eggplant* tip and fruit borer insects, cut and destroy the affected tip along with the insects. Insect reproduction is likely to be greatly reduced by using pheromone traps.

Use spray of approval dose of insecticides, if necessary or recommended local organic insecticides may be used.

- Arrange for hand pollination of pumpkin vegetables. If beetles appear, kill them by hand in the morning and afternoon.
- In case of fly infestation in pumpkin, use pheromone and poison traps together. Pesticides of Alpha-Cypermethrin group can be used.
- Drain out excess water from the land.
- Apply pesticides after current spell of rainfall.

### **Horticultural crops**

- Fruit orchards need to be intercultural operation.
- Sumithion 50 EC of Phenthothion group should be mixed with 1.12 ml per liter of water and sprayed in the last afternoon to control flies the time of fruit maturity in mango tree. Spraying of all types of pesticides should be stopped 15-20 days before fruit collection.
- Apply Isoprocarb (MIPC) group pesticide if banana beetle infestation occurs.
- Drain out excess water from the land.
- Apply pesticides after current spell of rainfall.

### **Livestock**

- Cattle should be fed with hay, raw grass and hand-made granular feed. Preserve paddy straw properly now.
- Vaccinate the cattle to prevent disease.
- Keep the cattle house dry and clean. Use mosquito nets or earthenware pots coils at room.
- Keep cattle safe place from lightning and rain.

### **Poultry**

- Vaccinate the chickens regularly to prevent disease.
- Keep the poultry house dry and clean. Use mosquito nets or earthenware pots coils at room.

### **Fishery**

- Now is the right time to stock fish. Prepare the pond.
- Catch all the old fish by drying the pond or applying Rotenon (25 g / decimal / ft). After 2/3 days apply 1 kg lime per decimal
- Apply fertilizer (200 g urea per decimal, 100 g TSP) and 3/4 days after lime application.
- 3/4 days after application of fertilizer, if the water color is green, store the layer-based fish fry.

## Realized Weather at different locations in the country

Rainfall for last 24 hours (till 09 AM on 26 May 2021) and maximum temperature on 25 May and minimum temperature on 26 May 2021 is given below:
