

NATIONAL AGROMETEOROLOGICAL ADVISORY SERVICE BULLETIN

**02 November 2022 (WEDNESDAY)
[FOR THE PERIOD 02.11.2022 – 06.11.2022]**

DISCLAIMER

Under the Agro-meteorological Information System Development Project, Agromet Advisory Service Bulletins at National & Sixty Four (64) districts have been prepared on experimental basis. These bulletins are being displayed through the website of Department of Agricultural Extension for valuable comments/ suggestions from all concerned.

ISSUED BY

Agro-Meteorological Information Systems
Development Project
Department of Agricultural Extension (DAE)
Ministry of Agriculture
In collaboration with Bangladesh
Meteorological Department

Agromet Advisories

According to the medium range forecast, there is no chance of rainfall in most of the districts of the country in the next five days. The following agromet advisories are provided in these circumstances:

Rice Aman

- Apply irrigation.
- Maintain 5-7 cm land water level.
- Present weather condition is congenial for False smut infestation. Apply Fertilizer management.
- Drain out water from the paddy field 15 days before harvesting
- If the crop is 80% mature, collect it in a sunny day.

Vegetable

- Powdery mildew disease can occur in cucumbers. For control, apply pesticides of the hexaconazole or mancozeb group.
- Eggplant may be attacked by tip and fruit borer under prevailing weather conditions. For control, cut and destroy the affected tip along with the insects. Insect reproduction is likely to be greatly reduced by using pheromone traps. Use spray of approval dose of insecticides, if necessary or recommended local organic insecticides may be used.
- Under the prevailing weather condition, there is a chance of aphid attack in beans and cabbage. Use the approved dose of Chloropyrix group of pesticides.
- Apply Irrigation.

Horticultural

- Farmers are advised to go for bagging of the banana bunches with muslin cloth or polyethylene before fruit set in order to protect the fruits from the attack of banana fruit and leaf scarring beetle.
- Guava may be attacked by caterpillars under the prevailing condition. For control, spray 05 grams of soap powder per liter of water.
- Coconut trees may be attacked by spiders under prevailing weather condition., all the young caconut of the affected tree should be cut down and burnt. Infected trees and nearby young trees should be sprayed with any spider repellent such as Omite 57 EC mixed in 1.5 ml of one liter of water.
- Apply Irrigation.

Livestock

- Give Vaccination based on age and physical condition of cattle.
- Give dewormer if livestock are not given dewormed.
- Keep sheds and floors clean.

- If any disease symptoms appear, consult a veterinary doctor immediately for appropriate treatment.

Poultry

- High power bulbs (100 watts or more) in the poultry shed for 1-2 hours after dusk will increase egg production and diseases will reduce.
- If any disease symptoms appear, consult a veterinarian doctor immediately for proper treatment

Fishery

- Contact the nearest upazila fisheries office if any fish disease occurs or if the desired growth is not achieved.
- Drain the pond and remove the black/rotten sludge from the bottom.
- Repair pond banks if they are damaged.
- Start preparing the pond for the next year by harvesting all the fish if it is an annual pond.
- Reduce food intake in winter. Stop feeding if necessary
- Application of 250 grams of lime per decimal at the beginning of winter helps to get rid of fish diseases.

Realized Weather at different locations in the country

Rainfall for last 24 hours (till 06 AM on 02 November 2022) and maximum temperature on 01 November and minimum temperature on 02 November 2022 is given below:
